SUMMARY

Frontend Developer with hands-on experience building and shipping production web applications using React, Next.js, and TypeScript. Built a QR-based food ordering platform that was discovered on GitHub by a client who hired me to scale it by adding real-time table management and Stripe Connect integration. Focused on writing clean, maintainable UI code that works in the real world.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML, CSS
Frameworks & Runtime: Next.js, Node.js
Libraries & Tools: React, Redux, Zustand, TanStack Query, React Hook Form, REST APIs, Git & GitHub, Stripe, Google APIs
UI & Design: Tailwind CSS, Material UI, Shadcn, Responsive Design, Component Architecture
Databases: PostgreSQL
Cloud Platforms: Supabase, Appwrite
Hosting & Infrastructure: Vercel
Testing & QA: Vitest, Cypress, Jest

EXPERIENCES

Fastmenu - Restaurant Management SaaS platform Remote
Freelance Software Developer Jul-2025 - Mar-2026

- Built and delivered a Dining OS platform for restaurants, initially launched as a basic digital menu system and later expanded into a full-featured product based on client requirements.
- End-to-end development using React, Tailwind CSS, and Material UI, building scalable, reusable components while optimizing server-state management with TanStack Query and handling client state efficiently using Zustand.
- Integrated Stripe Connect for payments and vendor onboarding, and implemented Google APIs for translation and location-based features.

PROJECTS

Order Ease | React, Redux, Material UI and Firebase May-2025
Live: <https://orderease.food>

- Developed a simple QR-based food ordering system for restaurants.
- Implemented role-based access control for different user roles.

Open Radar | React, Tailwind, GitHub API, Vercel Edge Functions Jun 2025
Live: <https://openradar.live>

- Discovery platform that fetches and curates good-first issues to help developers find beginner-friendly open-source contributions.
- Secured GitHub API credentials server-side using Vercel Edge Functions.
- Implemented an Everything AI section that aggregates trending AI repositories.

Resumate | React, Redux, Appwrite, Firebase Auth, Material UI Mar 2025
Live: <https://resumate.shop>

- Full-featured resume builder with customizable templates, live preview, and PDF export.
- Integrated Appwrite for backend services and user authentication.
- Added a section where users can get insights on their resume using the Gemini API.

EDUCATION

Woolf University (Almabetter) Online
MS in Computer Science: Cloud Computing with AI System Design 2023 - 2026

Veer Narmad South Gujarat University Surat
Bachelor of Commerce 2020 - 2023
